Contributing Factors or "Red Flags" on the Road to HSA-Alt Student Identification¹

Contributing Factors: *Part of Hawaii State Participation Guidelines	Red Flags: Do NOT use as contributing factors
Part of Hawaii State Participation Guidelines	Do NOT use as contributing factors
IEP Team decision*	 Individual/Administrator decision Concern about meeting 1% Cap
 Student with most significant cognitive disability* Def. "A student with a most significant cognitive disability is one who has records that indicate a disability or multiple disabilities that significantly impact intellectual functioning and adaptive behavior. This is NOT determined by an IQ test score, but rather by a holistic understanding of a student." ¹ 	 Social, cultural, environmental factors* Low expectations for performance* Excessive absences* Socio-economic status Poor academic preparation Language/English Learner (EL) status
• Limited adaptive behavior* Def. "Adaptive behavior is the essential actions required by an individual to live independently and to function safely in daily life."	Anticipated disruptive behavior
	Anticipated emotional duress
• Need for modified curriculum* Range Performance Level Descriptors	Need for accommodations or specialized services
	Augmentative assistive communication
 Need for extensive, repeated, individualized instruction* 	Instructional setting; e.g., FSC setting
 Range Performance Level Descriptors are at an appropriate instructional level for student HSA-Alt is an appropriate test for student 	• Poor academic preparation; three or more grade levels below peers
	Low reading level
	General assessment is "too hard"
	Impact of test scores on accountability system

Characteristics of students with the most significant cognitive disability:

Students who are eligible for HSA-Alt testing may be from any of the disability categories listed in the IDEA. The three most prevalent disability categories for HSA-Alt identified students are the IDEA categories: intellectual disability, autism spectrum disorder, or multiple disabilities. HSA-Alt identified students are typically identified early (pre-K or K) and exhibit limited expressive and receptive communication capacities.
