

Accommodation vs. Modification

A	M
	1. Limit information presented on page, large print, and more space between lines.
	2. A multiple choice test on identical facts is provided while other students "fill in the blank"
	3. Using blocks to build structures while other children do science experiments.
	4. Students respond verbally instead of writing
	5. Learning letters and letter sounds while classmates read chapter books.
	6. Completing assembly tasks while classmates complete independent work.
	7. Testing on continents while classmates are tested on countries of Europe.
	8. Highlight important text.
	9. Extending a 2 part pattern while classmates identify the unit of a 3 part pattern.
	10. Student uses an abacus when completing his math assignment.
	11. Matching numerals to quantities while classmates put items in sets.
	12. Homework limited to a certain number of minutes/hours instead amount of work to be completed.
